## **DISMISSAL OF CERTIFICATES OF ELIGIBILITY FOR CLASS A TELEVISION STATION STATUS**

On November 29, 1999, the Community Broadcasters Protection Act of 1999 was signed into law. That legislation provides that a low power television station licensee may convert the secondary status of its station to the new Class A status, provided it can satisfy certain statutorily-established criteria.

To become eligible for a Class A certificate of eligibility, the licensee's station must, during the 90-day period ending November 28, 1999, have: (1) broadcast a minimum of 18 hours per day; (2) broadcast an average of at least three hours per week of programming produced within the market area served by the station or by a group of commonly-controlled low power television stations; and (3) been in compliance with the Commission's regulations applicable to the low power television service. The legislation also provided that licensees intending to seek Class A designation file a certification of eligibility with the Commission no later than January 28, 2000.

The following entities listed in the attached Appendices have filed statements of eligibility. The entities listed in Appendix A were permittees of low power television broadcast stations during all or part of the 90-day period ending November 28, 1999 and the Community Broadcasters Protection Act of 1999 limits Class A status eligibility to only licensees of such stations during that period. See Report and Order in MM Docket No. 00-10, entitled "Establishment of a Class A Television Service," 15 FCC Rcd 6355, 6369-70 (2000). In addition, those entities listed in Appendix B did not, as required, file statements of eligibility on or before January 28, 2000, the statutory deadline. Id. at 6363. Accordingly, the statements of eligibility filed by the entities listed in the Appendices are materially deficient and are dismissed.

By: Chief, Mass Media Bureau
